52817
Plate Mounting Tape

Product Description

Tesa 52817is a soft density foam plate mounting tape designed for photopolymer plates. It is equipped with a low tack acrylic adhesive that allows strong adhesion on both sides. This tape is solvent resistant. Its foam characteristics include highly compressible foam, long lasting recovery properties as well as low thickness tolerances. This plate mounting tape is suitable for plates thicknesses from 45-67 mils.

Main Applications

- Low tack surface characteristics
- Strong adhesion on both sides
- Solvent resistant

Technical data

	Metric	Imperial
Thickness	381 µm	15 mil

Backing

PE foam

Type of Adhesive

Tackified acrylic

Liner

PP

Hardness

Soft

Note: The physical and performance characteristics shown are averages obtained from tests performed according to ASTM and PSTC test methods. MPI Matco can make no warranty of any kind as to the results of the adhesive product use. The information published here is representative of laboratory research on these products and is believed to be reliable. Values should not be used for specification purposes. Each user should perform their own tests to determine the suitability of the product for their intended application and shall assume all risks and liabilities in connection therewith. Materials should be stored at 70°F (21°C) with 50% relative humidity.
