

72026 Plate Mounting Tape

Product Description

Tesa 72026 is a medium-hard density foam plate mounting tape designed for mounting thicker photopolymer plates. It is equipped with a high tack acrylic adhesive that allows fair plate bonding, fair plate demounting and sufficient tape bonding towards sleeve side. Adhesive bond strength will not increase over time. Its foam characteristics include highly compressible foam, long lasting recovery properties as well as low thickness tolerances. This plate mounting tape is suitable for plates thicknesses from 67-107 mils.

Main Applications

- High tack surface characteristics
- Fair plate bonding
- Fair plate demounting
- Sufficient tape bonding towards sleeve side
- Blue color coding

Technical data

	Metric	Imperial
Thickness	508 µm	20 mil
Backing	Type of Adhesive	Liner
PE foam	Tackified acrylic	PP

Hardness

Medium-Hard

Note: The physical and performance characteristics shown are averages obtained from tests performed according to ASTM and PSTC test methods. MPI Matco can make no warranty of any kind as to the results of the adhesive product use. The information published here is representative of laboratory research on these products and is believed to be reliable. Values should not be used for specification purposes. Each user should perform their own tests to determine the suitability of the product for their intended application and shall assume all risks and liabilities in connection therewith. Materials should be stored at 70°F (21°C) with 50% relative humidity.
