30LC-1620
Surface Protection Film

Product Description

30LC-1620 is a high tack protective film consisting of a self-wound low density polyethylene carrier. It is made with a water based acrylic adhesive. The protective film provides abrasion, tear and puncture resistance and is suitable for interior applications. It also has a soft and easy release.

Main Applications

- Masking and protection of a variety of surfaces

Technical data

	Metric	Imperial
Thickness	76 µm	3 mil
Adhesion to steel	1.8 to 2.2 N/cm	16 to 20 oz/in
Elongation at Break	450-600%	450-600%
Tensile Strength	5075 to 6125 N/cm	2900 to 3500 lb/in

Backing

LDPE film

Type of Adhesive

Water based acrylic

Colour

Note: The physical and performance characteristics shown are averages obtained from tests performed according to ASTM and PSTC test methods. MPI Matco can make no warranty of any kind as to the results of the adhesive product use. The information published here is representative of laboratory research on these products and is believed to be reliable. Values should not be used for specification purposes. Each user should perform their own tests to determine the suitability of the product for their intended application and shall assume all risks and liabilities in connection therewith. Materials should be stored at 70°F (21°C) with 50% relative humidity.
