

SL1

Manual Definite Length Tape Dispenser

Product Description

This small manual benchtop definite length dispenser accepts most tapes up to 1" wide with a maximum roll diameter of 5 -1/2" on a 1" or 3" core. A simple push on the smooth action lever will deliver up to 4" of tape. The longer lengths of tape can be achieved by multiple pushes of the lever. To change the tape length loosen the thumbscrew holding the lever, move the lever to the desired position and tighten the thumbscrew. The cutting of the tape is done as the operator lifts the tape against the blade as the tape is being removed from the machine.

Characteristics

- Manual definite length tape dispenser.
- Simply pull the handle and the desired length of tape is dispensed. To cut the tape, pull the tape up against the blade.
- Works with most types of non-reinforced tapes up to 1 inch wide.
- Can dispense up to 4 inches of tape per pull of the handle.
- Easy to adjust for tape length using a thumb screw, no tools required.
